

Tide measurement using rope and tape 24/07/2026

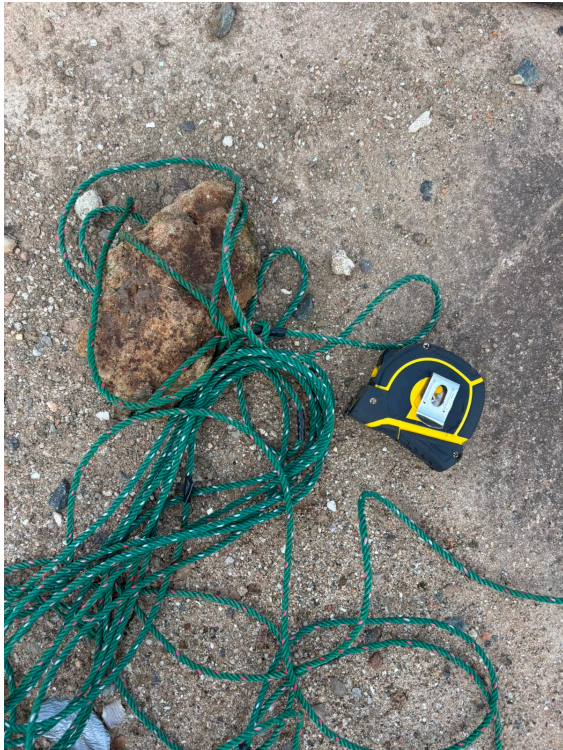

Top of wall 4,5 m

Top of water to top of wall

2.61 (08.30) $\sim$ 1.89

2.64 (08.40) $\sim$ 1.86

2.67 (08.50) $\sim$ 1.83

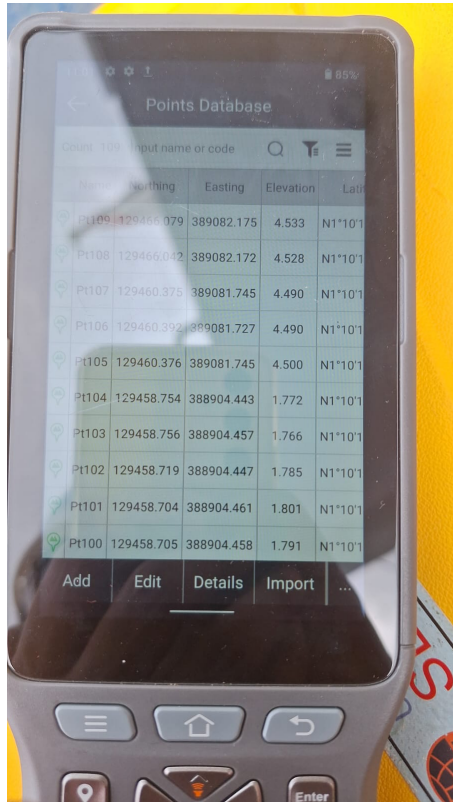

Diff :

08.30 -> 0.05

08.40 -> 0.03

08.50 -> 0

Quay wall and waterline RTK check 24/07/2026

Name	Northing	Easting	Elevation	Lat
Pt109	129466.079	389082.175	4.533	N1°10'1
Pt108	129466.042	389082.172	4.528	N1°10'1
Pt107	129460.375	389081.745	4.490	N1°10'1
Pt106	129460.392	389081.727	4.490	N1°10'1
Pt105	129460.376	389081.745	4.500	N1°10'1
Pt104	129458.754	388904.443	1.772	N1°10'1
Pt103	129458.756	388904.457	1.766	N1°10'1
Pt102	129458.719	388904.447	1.785	N1°10'1
Pt101	129458.704	388904.461	1.801	N1°10'1
Pt100	129458.705	388904.458	1.791	N1°10'1

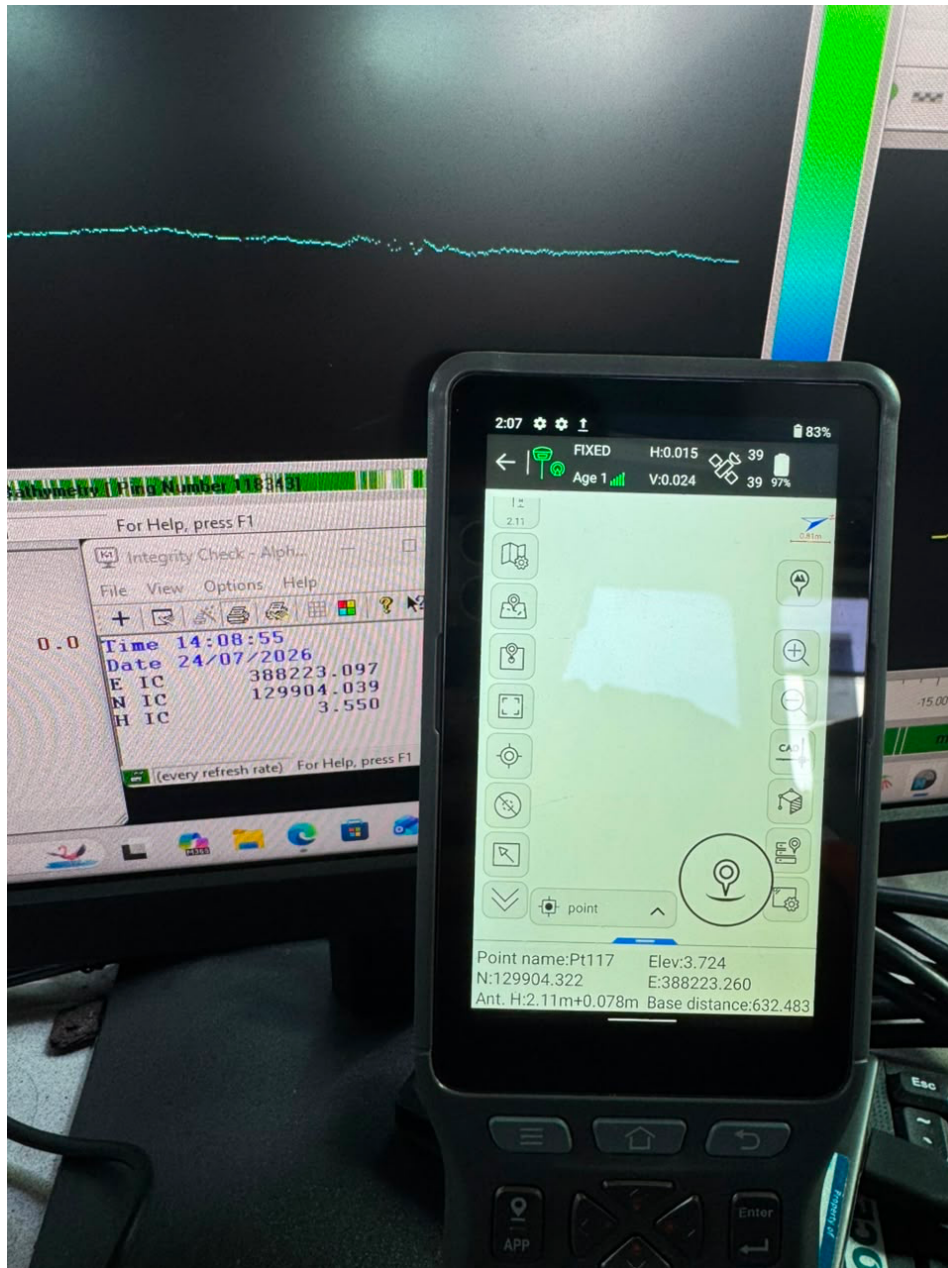

Result with RTK :

Measurement 1 at jetty markobar

Fix 10.40 : 1.785, tide 1.746, diff 0.039m

Measurement 2 at ref +4.500

Fix 10.50 : 4.528, ref 4.500, diff 0.028m

I tried to compare same point behind the pole with rtk stonex and offset in qinsy, the comparison has 0.15 - 0.2m difference
